**Subject:** Comprehensive Plan input

Dear Mr. Poole,

I am not able to attend the meeting tomorrow night, but wanted to throw in my two cents-- perhaps ten cents.

I do NOT see uncontrolled growth in James City County as "sustainable." Our infrastructure needs, especially water consumption and the impact on our other natural resources, would be stressed. I'd hate to see water-rationing implemented here some day.

Each new home is revenue negative. The build out numbers I've seen (200,000?) are frightening. We moved here 6 years ago for a relaxed style of living. Every time we return here from a visit to the Northeast, my blood pressure drops and I thank God for the day we decided to come here. Please do not make me regret that decision by supporting a "Comprehensive Plan" that is neither comprehensive nor sustainable.

Regards,  
A JCC resident
