

Chimney Certification for Installation or Replacement of Fuel Fired Equipment in Existing Buildings

2018 USBC Part I (VRC 113.3.1) **Equipment changes:** Upon the replacement or new installation of any fuel-burning appliances or equipment in existing R-5 occupancies, an inspection or inspections shall be conducted to ensure that the connected vent or chimney systems comply with the following:

1. Vent or chimney systems are sized in accordance with the International Residential Code.
2. Vent or chimney systems are clean, free of any obstruction or blockages, defects or deterioration and are in operable condition. Where not inspected by the local building department, persons performing such changes or installations shall certify to the building official that the requirements of items 1 and 2 of this section are met.

Permit number: _____ Address: _____

Upload this completed document to the appropriate permit through your permit portal. Once that is complete you should schedule your final inspection. The final inspection will not be approved if the certification is not uploaded. This may lead to a rejected inspection with the associated reinspection fees.
